Migration Accelerator for moving to M-Files

Make migration an opportunity, not a challenge

Migration Accelerator is an advanced automated content migration tool built to handle the complexity of migration from legacy Enterprise Content Management (ECM), Enterprise File Sync and Share platforms to M-Files intelligent information management platform hosted on-premises or in the cloud.

Migration Accelerator includes advanced features for source content analytics, intelligent content classification, metadata and taxonomy enrichment, security remodelling, content re-structuring and format/OCR conversion as part of your migration to M-Files. It allows you to gain maximum value from your business content. Turning migration into an opportunity to enrich content, harness collective knowledge, data and security compliance, transform your business processes and improve collaboration in your modern workplace.

Trusted around the world for complex migrations:

Australian Government   **Regency Centers.**   **MOHELA**®   **UK Parliament**

Benefit throughout every stage of your migration to M-Files

Before you migrate

Actionable insights into content
Full discovery and analysis of your content with detailed drill-down reports using Power BI.

Identify potential issues
Stay on schedule and in budget with intelligent pre-migration checks to identify potential risks before migration.

Content Architecture Review
Review metadata, taxonomy, structure and security permissions to identify potential information architecture gaps.

In-depth analytics
Rules-based engine for detailed content analytics to mitigate migration risks early by understanding comprehensive item and version level audits.

While you migrate

Maintain business continuity
Minimise downtime thanks to high-speed, incremental migration and reusable scheduled tasks.

Intelligently classify documents
Our AI engine uses machine learning to intelligently recognise and classify your business documents and data.

Enrich and restructure content
Enrich your content via classification, IA remapping, metadata & taxonomy. Plus advanced OCR, image to PDF and other document format conversion.

Seamlessly enforce compliance
Customisable rules give you the power to ensure compliance with your internal and industry standards.

Automatically manage links
Automatically update links inside documents to keep them active post-migration.

High-performance scalability
Migrate millions of items a day using our scalable, high-throughput engine.

After you migrate

Integrate your content portfolio
Sync or integrate multiple systems and repositories easily and quickly.

Improved user productivity
Exploit the potential of your content through optimised AI and searchability; turning it into a powerful business asset.
